

Nalcor Energy makes \$10,000 donation to Ronald McDonald House

December 21, 2009 – Nalcor Energy is proud to support Ronald McDonald House Newfoundland & Labrador (RMHNL) with a \$10,000 donation. For children with serious illnesses, it will play a powerful role in helping them lead happier and healthier lives.

Giving back to communities in Newfoundland and Labrador is a priority for Nalcor Energy and we make every effort possible to be a valued corporate citizen and to improve the quality of life for people throughout the province. This means actively supporting organizations in the communities where Nalcor operates and where our employees live.

This Christmas, Nalcor Energy is supporting the Ronald McDonald House Capital Campaign for the development of Newfoundland and Labrador's first Ronald McDonald House.

The need for a Ronald McDonald House is truly felt across the province. Many Newfoundlanders and Labradorians travel great distances for specialized healthcare services- particularly for pediatric care in St. John's. The goal of the Capital Campaign is to raise \$4.5 million in funding to cover necessary costs. The RMHNL Board of Directors plan to break first ground in late 2010, with the hope to open its doors in 2011.

Visit our Ronald McDonald House webpage to learn more about Nalcor Energy's efforts to contribute to this campaign.
